

Publicaciones en revistas científicas con referato

1. Cañas F.M.

Bone sodium Exchange. Effect of rachitism and vitamin D₃ treatment of chicks.
Calcified Tissue Research 13: 93-97, 1973.

2. Cañas F.M.

Efecto de la edad sobre el contenido de sodio en hueso.
Acta Physiologica Latinoamericana 23: 469-473, 1973.

3. Cañas F.M, Ortiz O.E., Asteggiano C.A. and Pereira R.D.

Effects of *Solanum malacoxylon* extract on rachitic chicks. Comparative study with vitamin D₃.
Calcificae Tissues Research 23: 297-301, 1977.

4. Cañas F., Pereira R., Tolosa N. and Asteggiano C.

Effect of dietary phosphate on intestinal calcium and phosphate absorption
Acta Physiologica Latinoamericana 30:245-252, 1980

5. Asteggiano C., Tolosa N., Pereira R., Moreno J. and Cañas F.M.

Lack of relationship between activity of intestinal alkaline phosphatase and calcium or phosphate absorption.
Acta Physiologica Latinoamericana 31: 77-83, 1981.

6. Tolosa de Talamoni N., Pereira R., Moreno J., Asteggiano C. and Cañas F.

Effects of vitamin D₃ on the uptake and release of calcium by isolated intestinal mitochondria.
Acta Physiologica Latinoamericana 32: 147-152, 1982.

7. Pereira R., Tolosa de Talamoni N., Asteggiano C.A. and Cañas F.M.

Phosphate intestinal secretion and absorption by isolated ileal loop: Effects of cholecalciferol and diet phosphate.
Acta Physiologica et Pharmacologica Latinoamericana 34: 419-426, 1984.

8. Moreno J., Cortés C.S., Asteggiano C.A., Pereira R., Tolosa de Talamoni N., Cañas F.M. and Blanco A.

Changes of intestinal alkaline phosphatase produced by cholecalciferol or 1,25-(OH)₂D₃ in vitamin D-deficient chicks.
Archives of Biochemistry and Biophysics 240: 201-206, 1985.

9. Tolosa de Talamoni N., Pereira R., Hauen de Bronia D.L., Moreno J. and Cañas F.M.

Phospholipids and sialic acid changes produced by vitamin D₃ on intestinal mitochondria.
Metabolism 34: 1007-1011, 1985.

10. Tolosa de Talamoni N., Hauen de Bronia D.L., Pereira R., Moreno J. and Cañas F.M.

Phospholipid and fatty acid changes produced by cholecalciferol on intestinal mitochondria membranes.

Biochemistry International 15: 1115-1125, 1987.

11. Tolosa de Talamoni N., Morero J. and Cañas F.

Vitamin D₃ administration increases the membrane fluidity of intestinal mitochondria.

Biochemistry International 19: 701-707, 1989.

12. Tolosa de Talamoni N., Mykkanen H. and Wasserman R.

Enhancement of sulfhydryl groups availability in the intestinal brush border membranes by deficiencies of dietary calcium and phosphorus in chicks.

J. of Nutrition 120: 11 98-1204, 1990.

13. Tolosa de Talamoni N., Mykkanen H., Cai Q. and Wasserman R.H.

Hormonal effects on the sulfhydryl groups associated with intestinal brush border membrane proteins.

Biochem. Biophys. Acta, 1094:224-230, 1991.

14. Wasserman R.H., Smith C., Brindak M., de Talamoni N., Fullmer C., Penniston J. and Kumar R.

Vitamin D and mineral deficiencies increase the plasma membrane calcium pump of chicken intestine.

Gastroenterology 102:886-894, 1992.

15. Tolosa de Talamoni N., Smith C.S., Wasserman R.H., Beltramino C., Fullmer C.S. and Penniston J.T.

Immunocytochemical localization of the plasma membrane calcium pump, calbindin D_{28k} and parvalbumin in the avian and mammalian cerebellum.

Proc. Natl. Acad. Sci. USA, 90: 11 949-11953, 1993.

16. Tolosa de Talamoni N., Baudino V. and Marchionatti A.M.

Effects of vitamin D and DL-buthionine-S,R-sulfoximine on intestinal calcium absorption.

En: *Vitamin D. A pluripotent steroid hormone: structural studies, molecular endocrinology and clinical applications.*

(Edits. A.W. Norman, R. Bouillon, M. Thomasset), pp. 426-427, 1994, Walter D. Gruyter, Berlin.

17. Perez A., Pereira R., Cañas F. and Tolosa de Talamoni N.

Effect of vitamin D on the oxidoreductase activities of citric acid cycle.

En: *Vitamin D. A pluripotent steroid hormone: structural studies, molecular endocrinology and clinical applications.*

(Edits. A.W. Norman, R. Bouillon, M. Thomasset), pp. 741-742, 1994, Walter D. Gruyter, Berlin.

18. Perez A., Díaz de Barboza G., Pereira R. and Tolosa de Talamoni N.

Vitamin D affects the activity of NAD-linked oxidoreductases of Krebs cycle.

Biochemistry and Molecular Biology International 36: 537-544, 1995.

- 19. Tolosa de Talamoni N.**
Calcium and phosphorus deficiencies alter the lipid composition and fluidity of intestinal basolateral membranes.
Comparative and Biochemistry Physiology [A] 115: 309-315, 1996.
- 20. Tolosa de Talamoni N., Marchionatti A.M., Baudino V. and Alisio A.**
Glutathione plays a role in the chick intestinal calcium absorption.
Comparative Biochemistry and Physiology [A] 115: 127-132, 1996.
- 21. Alisio A., Cañas F., Bronia D.H., Pereira R. and Tolosa de Talamoni N.**
Effect of vitamin D deficiency on lipid composition and calcium transport in basolateral membrane vesicles from chick intestine.
Biochemistry and Molecular Biology International 42: 339-347, 1997.
- 22. Pérez A. and Tolosa de Talamoni N.**
A genomic mechanism would be involved in the increment of malate dehydrogenase activity in Krebs cycle produced by 1,25-dihydroxyvitamin D3.
En: *Vitamin D, chemistry, biology and clinical applications.*
(Edits. A.W. Norman, R. Bouillon, M. Thomasset), pp. 761-762, 1997, University of California Press, Riverside, USA.
- 23. Tolosa de Talamoni N.**
Vitamina D y Absorción Intestinal de Calcio.
Revista Argentina de Endocrinología y Metabolismo 35: 28-30, 1998.
- 24. Tolosa de Talamoni N., Pérez A. and Alisio A.**
Effect of cholecalciferol on intestinal epithelial cells.
En: *Trends in Comparative Biochemistry and Physiology.*
(Ed. Research Trends), pp. 179-185, 1998, Trivandrum, India.
- 25. Tolosa de Talamoni N. and Centeno V.**
Low calcium diets in humans and in experimental animals: classic models to understand calcium homeostasis and vitamin D endocrine system.
Endocrinologia 46: 241 - 244, 1999.
- 26. Díaz de Barboza G., Beltramino C., Alisio A., Britto L. and Tolosa de Talamoni N.**
Immunocytochemical detection of calbindin D_{28k} in the chicken tectofugal and thalamofugal visual pathways.
En: *Vitamin D Endocrine System.*
(Edits. A.W. Norman, M. Thomasset and R Bouillon), pp. 677-680, 2000, University of California Press, Riverside, USA.
- 27. Marchionatti A., Alisio A., Díaz de Barboza G., Baudino V. and Tolosa de Talamoni N.**
DL-buthionine-S,R-sulfoximine affects the activity of intestinal alkaline phosphatase.
Comparative Biochemistry and Physiology 129C: 85-91, 2001.
- 28. Tolosa de Talamoni N.**
Genética de la osteoporosis.

- 29. Tolosa de Talamoni, N. and Marchionatti, A.**
Thiol redox state and intestinal calcium absorption.
En: Trends in Biochemistry and Physiology.
(Ed. T. Brittain et al.), Research Trends, pp. 175-183, 2002, Trivandrum, India.
- 30. Tolosa de Talamoni N., Pérez A., Smith C., Riis R., Miller M. and Wasserman R.**
Comparative immunolocalization of plasma membrane calcium pump and calbindin D_{28k} in chicken retina during the embryonic development.
European Journal of Histochemistry 46: 333-340, 2002.
- 31. Díaz de Barboza G., Britto L., Beltramino C., De Olmos S., De Olmos J., Pfeiffer C. and Tolosa de Talamoni N.**
Effect of retinal ablation on the expression of calbindin D_{28k} and GABA in the chick contralateral optic tectum.
European Journal of Histochemistry 47: 371-378, 2003.
- 32. Marchionatti A.M., Díaz de Barboza G., Centeno V., Alisio A. and Tolosa de Talamoni N.**
Effect of a single dose of menadione on the intestinal calcium absorption and associated variables,
Journal of Nutritional Biochemistry 14: 466-472, 2003.
- 33. Centeno V., Díaz de Barboza G., Marchionatti A.M., Alisio A., Dallorso M., Nasif R. and Tolosa de Talamoni N.**
Dietary calcium deficiency alters Ca²⁺ uptake and Ca²⁺ extrusion mechanisms from chick enterocytes.
Comparative Biochemistry and Physiology 139A: 133-141, 2004.
- 34. Díaz de Barboza G., Pereira R. and Tolosa de Talamoni N.**
Distribution and physiological role of calbindin in the brain.
En: Trends in Comparative Biochemistry and Physiology.
(Ed. T. Brittain et al.), Research Trends, Trivandrum, India, 10: 119-129, 2004.
- 35. Marchionatti A.M. and Tolosa de Talamoni N.**
Effect of menadione on intestinal calcium absorption and antioxidant enzymes.
En: XII Bienal Meeting of the Society for Free Radical Research
(Edits. A. Boveris and S. Puntarulo) pp. 349-353, 2004, Medimond SRL, Bologna, Italia.
- 36. Tolosa de Talamoni N.**
Vitamina D: aspectos moleculares y fisiológicos.
Revista de la Facultad de Odontología de la Universidad Nacional de Cuyo 2: 29-32, 2004.
- 37. Tolosa de Talamoni N., Narváez C. and Welsh J.**
Menadione potentiates the oxidative stress produced by 1,25(OH)₂D₃ on breast cancer cells.
En: XII Bienal Meeting of the Society for Free Radical Research.

(Edits. A. Boveris and S. Puntarulo) pp. 201–205, 2004, Medimond SRL, Bologna, Italia.

- 38. Tolosa de Talamoni N., Marchionatti A.M., Díaz de Barboza G. and Pérez A.**
Cellular and biochemical alterations caused by artificial depletion of glutathione.
Current Enzyme Inhibition 1: 123-130, 2005.
- 39. Picotto G., Pérez A., Díaz de Barboza G. y Tolosa de Talamoni N.**
Genes candidatos asociados a la osteoporosis.
Actualizaciones en Osteología 3: 90-95, 2007.
- 40. Tolosa de Talamoni N.**
Osteoporosis y polimorfismos del gen del receptor de vitamina D.
Endocrinología y Nutrición 64: 96 - 101, 2007.
- 41. Ulla M., Pérez A., Elías V., Binci M., Pretel E., Castro M., Talamoni J., Costero B., Mammana M., Babini S., Díaz de Barboza G. and Tolosa de Talamoni N.**
Vitamin D receptor and estrogen receptor genotypes in pre and perimenopausal women from Argentina.
Medicina 67: 32-38, 2007.
- 42. Liaudat C., Bohl L., Picotto G., Marchionatti A. y Tolosa de Talamoni, N.**
Vitamina D y cáncer.
Actualizaciones en Osteología 4: 121-127, 2008.
- 43. Marchionatti A., Pérez A., Díaz de Barboza G., Pereira M. and Tolosa de Talamoni N.**
Mitochondrial dysfunction is responsible for the inhibition of the intestinal Ca^{2+} absorption caused by menadione.
Biochemistry & Biophysics Acta 1780: 101-107, 2008.
- 44. Merico V., Díaz de Barboza G., Vasco C., Ponce R., Rodriguez V., Garagna S., and Tolosa de Talamoni N.**
A mitochondrial mechanism is involved in apoptosis of Robertsonian mouse male germ cells.
Reproduction 135, 797-808, 2008.
- 45. Pérez A., Picotto G., Carpentieri A., Peralta López E., Rivoira M. and Tolosa de Talamoni N.**
Minireview on regulation of intestinal calcium absorption. Emphasis on molecular mechanisms of transcellular pathway.
Digestion 77: 22-34, 2008.
- 46. Pérez A., Ulla M.R., García B.A., Lavezzo M., Elías E., Binci M., Rivoira M.A., Centeno V., Alisio A. and Tolosa de Talamoni N.**
Genotypes and clinical aspects associated with bone mineral density in Argentine postmenopausal women.
Journal of Bone and Mineral Metabolism 26: 358- 365, 2008.

- 47. Centeno V., Díaz de Barboza G., Marchionatti A., Rodríguez V. and Tolosa de Talamoni N.**
Molecular mechanisms triggered by low calcium diets.
Nutrition Research Reviews 22: 163–174, 2009.
- 48. Marchionatti A., Picotto G., Narvaez C., Welsh J. and Tolosa de Talamoni N.**
Antiproliferative action of menadione and 1,25(OH)₂D₃ on breast cancer cells.
Journal Steroid Biochemistry Molecular Biology 113: 227-232, 2009.
- 49. Peralta López M., Miras M., Pérez A. y Tolosa de Talamoni, N.,**
El hueso en el síndrome de Turner.
Actualizaciones en Osteología 5: 25-31, 2009.
- 50. Miras M., Ochetti M., Martín S., Silvano L., Sobrero G., Castro L., Onassis M, Tolosa de Talamoni N., Perez A, Picotto G., Díaz de Barboza G. and Muñoz L.**
Serum levels of adiponectin and leptin in children born small for gestational age: relation to insulin sensitivity parameters.
Journal Pediatric Endocrinology & Metabolism 23: 463-472, 2010.
- 51. Pérez A., Centeno V. and Tolosa de Talamoni N.**
Molecular mechanisms involved in the enhancement of mitochondrial malate dehydrogenase activity by calcitriol in chick intestine.
Journal Nutrition Biochemistry 21: 1232-1237, 2010.
- 52. Rodríguez V., Díaz de Barboza G., Ponce R., Merico V., Garagna S. and Tolosa de Talamoni N.**
Spermatocyte apoptosis, wich involves both intrinsec and extrinsec pathways, explains the sterility of Graomys griseoflavus x Graomys centralis male hybrids.
Reproduction, Fertility and Development. 22: 478-488, 2010.
- 53. Centeno V., Picotto G., Pérez A., Alisio A. and Tolosa de Talamoni N.**
Intestinal Na⁺/Ca²⁺ exchanger gene and protein expression are regulated by 1,25(OH)₂D₃ in vitamin D deficient chicks.
Archives Biochemistry & Biophysics 509: 191-196, 2011.
- 54. Peralta López M., Miras M., Silvano L., Pérez A., Muñoz L., Centeno V., Sobrero G., Ulla M. and Tolosa de Talamoni N.**
Vitamin D receptor genotypes are associated with the bone mass in patients with Turner syndrome.
Journal Pediatric Endocrinology & Metabolism 24: 307-312, 2011.
- 55. Silvano L., Miras M., Pérez A., Picotto G., Díaz de Barboza G., Muñoz L., Martin S., Sobrero G., Armelini P., Mericq V. and Tolosa de Talamoni N.**
Comparative analysis of clinical, biochemical and genetic aspects associated with bone mineral density in small for gestational age children.
Journal Pediatric Endocrinology & Metabolism 24: 511-518, 2011.
- 56. Bohl L.P., Liaudat A.C., Picotto G., Marchionatti A.M., Narvaez C.J., Welsh J., Rodriguez V.A. and Tolosa de Talamoni NG.**

Buthionine sulfoximine and 1,25-dihydroxyvitamin D induce apoptosis in breast cancer cells via induction of reactive oxygen species.
Cancer Investigations 30: 560–570, 2012.

57. Carpentieri A., Díaz de Barboza G., Areco V., Peralta López M. and Tolosa de Talamoni N.

New perspectives in melatonin uses.
Pharmacology Research 65: 437-444, 2012.

58. Rivoira M., Marchionatti A., Centeno V., Peralta López M. and Tolosa de Talamoni N.

Sodium deoxycholate inhibits duodenal calcium absorption through oxidative stress and apoptosis.
Comparative Biochemistry & Physiology 162A: 397–405, 2012.

59. Peralta López M., Centeno V., Miras M., Silvano L., Pérez A., Muñoz L., Sobrero G., Ulla M. and Tolosa de Talamoni N.

Association of vitamin D receptor gene Cdx2 polymorphism with bone markers in Turner syndrome patients.
Journal Pediatric Endocrinology Metabolism 25: 669-671, 2012.

60. Picotto G., Liaudat A.C., Bohl L. and Tolosa de Talamoni N.

Molecular aspects of vitamin D anticancer activity.
Cancer Investigations 30: 604–614, 2012.

61. Marchionatti A.M., Pacciaroni A. and Tolosa de Talamoni N.G.

Effects of quercetin and menadione on intestinal calcium absorption and the underlying mechanisms.
Comparative Biochemistry Physiology A Molecular Integrative Physiology 164: 215–220, 2013.

62. Rodríguez V., Rivoira MA., Marchionatti AM., Pérez A. and Tolosa de Talamoni N.

Ursodeoxycholic and deoxycholic acids: a good and a bad bile acid for intestinal calcium absorption.
Archives of Biochemistry and Biophysics 540: 19-25, 2013.

63. Tolosa de Talamoni N., Areco V., Peralta López M., Díaz de Barboza G., Rivoira M. and Carpentieri A

Past, present and future of melatonin clinical use.
Melatonin and Melatonergic Drugs in Clinical Practics. Eds. V. Srinivasan et. Al., Springer. Cap 2 pp 27 – 42, 2014.

64. Díaz de Barboza G., Rodríguez V., Maldonado C., Ponce R, Theiler G. and Tolosa de Talamoni N.

Association of cellular and molecular alterations in Leydig cells with apoptotic changes in germ cells from testes of *Graomys griseoflavus* x *Graomys centralis* male hybrids.
Acta Histochemica 116: 1037-1045, 2014.

65. Carpentieri A., Marchionatti A., Areco V., Pérez A., Centeno V. and Tolosa de Talamoni N.

Antioxidant and antiapoptotic properties of melatonin restore intestinal calcium absorption altered by menadione.

Molecular and Cellular Biochemistry 387: 197 – 205, 2014.

66. Liaudat AC, Bohl LP, Tolosa de Talamoni NG, Maletto B, Pistoiresi Palencia MC, Picotto G.

Oxidative stress, cell cycle arrest and differentiation contribute toward the antiproliferative action of BSO and calcitriol on Caco-2 cells.

Anticancer Drugs 25: 810 – 818, 2014.

67. Rivoira M., Rodríguez V., Peralta López M. and Tolosa de Talamoni G.

Time dependent changes in the intestinal Ca^{2+} absorption in rats with type diabetes mellitus are associated with alterations in the intestinal redox state.

BBA Molecular Basis of Disease 1852: 386-394, 2015.

68. Díaz de Barboza G., Guizzardi S. and Tolosa de Talamoni N.

Molecular aspects of the intestinal calcium absorption.

World Journal of Gastroenterology, 21: 7142- 7154, 2015.

69. ArecoV., Rivoira, MA., Rodríguez V., Marchionatti AM., Carpentieri A. and Tolosa de Talamoni N.

Dietary and pharmacological compounds altering the intestinal Ca absorption in humans and animals”.

Nutrition Research Reviews. 2015. (En prensa)
